RE: Start of Construction Notice
Biers Run-Circleville 138 kV Line Cut-In Project
Case No. 21-1111-EL-BNR

Dear Neighbor,

You are receiving this letter because our records show you own property that's part of the Biers Run-Circleville 138 kV Line Cut-In Project.

AEP Ohio representatives plan to build .1 miles of 138-kilovolt (kV) transmission line along Westfall Road in Deerfield and Union townships in Ross County. The new power line connects Yellowbud Solar facility to the transmission grid. The regional transmission organization, PJM, requires utilities to serve customer requests for power.

Company representatives plan to begin construction in May and continue through next summer, depending on weather and other factors.

We filed the project with the Ohio Power Siting Board (OPSB), Case No. 21-1111-EL-BNR, in December and it was approved in March.

AEP Ohio representatives are committed to keeping customers, employees and contractors safe and healthy amid the COVID-19 pandemic. Crews take ongoing measures to work safely, including practicing social distancing and other prevention measures.

You may see crews walking or using all-terrain vehicles to access the power line during construction. Crews use existing roads or lanes whenever possible. If any damage results from the activities, AEP Ohio representatives can work with you to reimburse you or restore your property to its previous condition.

Please contact me if you have any questions about this project.

Sincerely,

Meghan Blankenship
